**EXAMINER'S COMMENT**

***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-12, drawn to general replicating of storage devices in a computer system, classified in class 711, subclass 162.
  - II. Claims 13-20, drawn to replicating storage devices in a network computer system having first and second interfaces, holding and comparing characteristics, means of referencing information to make a determination about where to store data, means of securing an area for replication, etc., classified in class 711, subclass 162.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct if they do not overlap in scope and are not obvious variants, and if it is shown that at least one subcombination is separately usable. In the instant case, subcombination I has separate utility such as use without the several above-listed limitations of subcombination II. See MPEP § 806.05(d).

3. Because these inventions are independent or distinct for the reasons given above and the inventions require a different field of search (see MPEP § 808.02), restriction for examination purposes as indicated is proper.

4. During a telephone conversation with Carl Brundidge (#29,621) on November 14, 2005 a provisional election was made without traverse to prosecute the invention of group II, claims 13-20. Affirmation of this election must be made by applicant in replying to this Office action. Claims 1-12 withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

#### **EXAMINER'S AMENDMENT**

6. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

7. The application has been amended as follows:
- Claims 1-12 are cancelled (as being directed to an invention non-elected without traverse whereas all elected claims are allowable).

***Information Disclosure Statement***

8. The information disclosure statement filed August 28, 2003 fails to comply with the provisions of 37 CFR 1.98 (b)(1) and (b)(4). It has been placed in the application file, but the information referred to therein has not been considered as to the merits. Applicant is advised that the date of any re-submission of any item of information contained in this information disclosure statement or the submission of any missing element(s) will be the date of submission for purposes of determining compliance with the requirements based on the time of filing the statement, including all certification requirements for statements under 37 CFR 1.97(e). See MPEP § 609.05(a).

***Oath/Declaration***

9. The oath or declaration is defective. A new oath or declaration in compliance with 37 CFR 1.67(a) identifying this application by application number and filing date is required. See MPEP §§ 602.01 and 602.02.

The oath or declaration is defective because: on page 2, the language should read, "national or PCT International filing date of this application." [corrected language underlined].
